

THE ASSOCIATION OF MODEL AGENTS

11-29 Fashion Street, London E1 6PX

T 020 7422 0699 F 020 7247 9230

amainfo@btinternet.com

2008

A female model should be at least 5ft 8ins tall (1.73cms) and more or less 34-24-34(86cm-61cm-86cm). A male model should be at least 6ft tall (1.83cms), Chest 40 (suit regular) inside leg 33ins (84cm). They should have clear skin, good hands, nails and teeth, healthy hair and regular features.

Apart from these physical characteristics, a model must be alert, intelligent, resourceful, reliable, good-natured and must also have a great deal of commonsense.

Needless to say few young people have all these attributes. Those that do have them must then go on to learn various skills models need to survive in a business with high running costs.

It is unlikely that you are one of the very small number of young people capable of getting established as a model, but if you still want to pursue the idea you should send two photographs, one showing your face and another showing what your shape is, together with details of height, measurements and age to one or more of the agents on the enclosed list. ENCLOSING A STAMPED ADDRESSED ENVELOPE LARGE ENOUGH FOR THE PHOTOGRAPHS TO BE RETURNED.

Thank you for your enquiry, if you do decide to drop the idea of modelling, good luck in whatever you decide to do.

General Secretary
